This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Pressing Need of More Shelf Room.

The library now contains over 140,000 volumes, and has reached and passed the limit of its capacity for shelf room. It is now so badly crowded that the books in many cases are placed in double rows on the shelves, and resort is had to other temporary methods of relief, which are a serious detriment to the classification and rapid service of the library. This matter should receive immediate attention, as delay only tends to render the service of the library more difficult and unsatisfactory, and it is earnestly committed to the serious attention of the Legislature.

C. B. TILLINGHAST,
Librarian.

Pressing Need of More Shelf Room.

I repeat, with added emphasis, the statement of last year: —

The library now contains over 140,000 volumes, and has reached and passed the limit of its capacity for shelf room. It is now so badly crowded that the books in many cases are placed in double rows on the shelves, and resort is had to other temporary methods of relief, which are a serious detriment to the classification and rapid service of the library. This matter should receive immediate attention, as delay only tends to render the service of the library more difficult and unsatisfactory, and it is earnestly committed to the serious attention of the Legislature.

C. B. TILLINGHAST,
Librarian.

New Stack Room.

In accordance with the provisions of the law enacted by the last Legislature the large rooms on the fifth floor, formerly occupied by the restaurant and kitchen, have been fitted up as an addition to the stack room of the library. It contains about three and a half miles of the finest steel shelving manufactured, and was constructed by the Art Metal Construction Company. The entire work has been a model of economic and artistic construction, under the direction of the architect, Mr. Wm. Chapman.
